

International Critical Communications Awards 2017

TETRA Today and *Land Mobile* are pleased to announce the second year of the International Critical Communications Awards (ICCA).

The ICCAs (formerly the International TETRA Awards) recognise excellence in the use of mission-critical communications around the world and celebrate the most innovative companies that are constantly developing and moving the market forward.

Produced with the support of the TCCA, the ICCAs take place during a time of change for the industry. The first projects to use LTE for mission-critical applications are underway in South Korea, the US and here in the UK, creating the need for manufacturers and service providers to position themselves as key players in this transition.

The ICCAs return to the Honourable Artillery Company in London on the 17th of February for a lavish ceremony, which will bring together key players in the industry to look back on the past year's achievements, make new friends and reunite with old colleagues.

Last year's event broke new ground for the number of entries and the ICCAs' judges were impressed by the high quality of entries (a [record number of nominations](#) were submitted over nine hotly-contested categories), which made the task of choosing the winners all the more challenging.

"The TCCA is delighted to be supporting the 2017 ICCAs, and would encourage as many organisations as possible to put forward their achievements for recognition," said Phil Kidner, CEO of the TCCA. "In particular, I am proud to promote the TCCA-led Young Engineer of the Year category, which will shine a spotlight on the individual who best represents the qualities and commitment required to ensure the success of critical communications products and solutions."

The ICCAs are now open to submissions for the following categories:

- Best use of TETRA for Public Safety
- Best Innovation Award
- Best Use of Control Room Systems
- Best Use of TETRA in Utilities
- TCCA Young Engineer of the Year
- Excellence in Radio Sites and Services
- Green Technology Award
- Outstanding Single Site TETRA Installation
- Best Use of TETRA for Transport
- Best Evolution to Future Broadband

These range of award categories offers opportunities for products, applications and solutions of merit across the critical communications market in both mission-critical and business-critical uses. [Click here to see more details on each of the categories.](#)

The call for entries closes on 12 December, so if you'd like to see your company lauded by your peers and don't want to lose out to the competition, [enter your best project or installation today.](#)

Good luck!
